AIRSOFT PISTOL

GAS BLOW BACK

- Insert magazine.

- Magazine release.

Don't put your finger on the trigger when you're loading.

- Pull the slide backward to a specific position, then release and let the slide moving forward to load the BBs in the chamber. Retain the hammer at the rear position.

- Put the safety ON when it is loaded.
- The safety cannot function when hammer is down.

AIRSOFT PISTOL

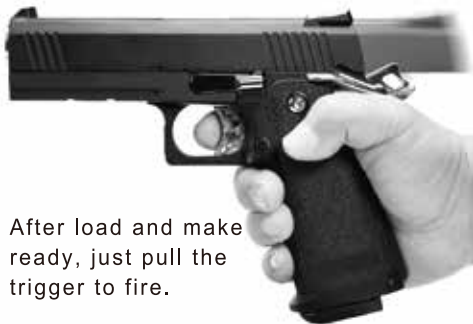

GAS BLOW BACK

- Half-cock position is a safety. A last ditch effort to stop the hammer from hitting the firing pin.

- Grip safety is a lever or other device situated on the grip of this airsoft which must be actuated by the operator's hand, as a natural consequence of holding the airsoft in a firing position, in order for the airsoft to fire.

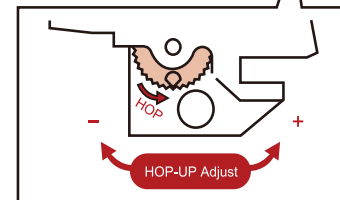

- After load and make ready, just pull the trigger to fire.

- When the last round of BBs is finished. The slide will stop by the slide release catch.

AIRSOFT PISTOL

GAS BLOW BACK

- The Hop-up system can make the trajectory of BBs slightly adjustable.
